

Taylor GeoServices (TGS) provides environmental and geology consulting services. TGS offers a wide range of expertise in a variety of areas, including hydrogeology, environmental site assessments, soil and groundwater remediation, landfill services, public water supply, water resource studies, land planning assistance, GIS, geothermal, stormwater management, and mapping services.

The company was started in 2000, incorporated in 2002, and combines the expertise of our exceptional staff; some who have been working in the environmental and geoscience fields since the mid 1980's.

TGS is a goal oriented company that works alongside our clients to accomplish their objectives and achieve results in a timely and cost conscious manner. Our clientele include private industry, fortune 500 companies, consultants, non-profit groups, government agencies, insurance and financial institutions, attorneys, developers and property owners. The majority of our business is from repeat customers and referrals, which speaks to our level of commitment to customer service.

Our corporate office is located in the Philadelphia Pennsylvania suburb of Newtown Square. From our main office and our other satellite locations in York/Gettysburg, Scranton/Wilkes-Barre and Pittsburgh, Taylor GeoServices can assist with your projects in the Pennsylvania and Mid-Atlantic region, as well as nationally.

Please do not hesitate contact us with any questions or requests for further information. We look forward to being part of your team and assisting you on your next project.
